

IFM Year 2 Required/Recommended Text 2011-2012

Microbiology

Each book has its strength and weaknesses for certain content areas in microbiology. Please look them over and purchase the one that suits you best. Faculty will assign readings from one or both of the books, depending on which book treats the content area best. Both books are on reserve in the library and periodically you may have to use the book that you did not purchase

Required Text:

1. Murray, Rosenthal, Kobayashi, & Pfaller, Medical Microbiology, 6th edition (Mosby, 2008). *Good comprehensive coverage of every organism – reasonable pictures and tables- a bit of a dry read.*

Murray, Rosenthal, Review of Medical Microbiology, 2005 *This is an excellent source of questions with annotated answers and it references sections in the parent book. However, it can be used as a stand alone question resource. I highly recommend it as a source of practice questions.*

2. Schaechter's Mechanisms of Microbial Disease LWW 2006
This book is divided into 2 sections – it has an overview of the pathogens organized by genera and an organ system approach as well. It's extremely well written and very interesting to read - really puts the pathogens in context, great cases and pictures. It is not a comprehensive text as it tends to focus on model pathogens. It comes with online access to 300 board style questions.

Pathology

There are two major Pathology Textbooks available. One of the two major textbooks is **required** for this course. You may select either the Robbins or the Rubin textbook since both now have excellent adjuncts including 'question books' for review.

Required Text:

ROBBINS textbook:

1. *Robbins and Cotran Pathologic Basis of Disease, 8th Edition, 2004*; Kumar, Abbas , Fausto and Aster, Elsevier, 2009

RUBIN textbook

2. *Rubin's Pathology Clinicopathologic Foundations of Medicine, fifth edition*, Rubin and Strayer, 2007

Recommended Robbin's Textbooks and Adjuncts:

1. A **highly** recommended review book keyed to Robbins with lots of excellent board-type questions is: *Robbins and Cotran Review of Pathology, Klatt and Kumar, 3rd edition*, Elsevier,
2. Another text which some students find useful is *Basic Pathology*, 8th Edition, Kumar, Cotran, & Robbins, Elsevier, 2007. While not as complete or as detailed as 'Big Robbins' this text is nicely illustrated and presents ideas in a succinct fashion. (You may hear this

called “Baby Robbins”).

3. For a quick, handy, review outline, try *Pocket Companion to Robbins Pathologic Basis of Disease*, 7th edition by Mitchell, Kumar, Abbas and Fausto, Elsevier, 2006. (You may hear this called “Fetal Robbins”).

Recommended Rubin’s Textbooks and Adjuncts:

4. *Rubin's Pathology Clinicopathologic Foundations of Medicine*, fifth edition, Rubin and Strayer, 2007.

5. The review book keyed to Rubin with lots of excellent board-type questions is: Lippincott’s Review of Pathology, Fenderson and Rubin, Lippincott, 2006.

6. The product in the Rubin line that is comparable to Robbins Basic Pathology (“Baby Rubin”) is *Essential Pathology*, 5th edition, 2008.

7. The review outline version for Rubin is called Lippincott’s Pocket Pathology, Hansel and Dintzis, Lippincott, 2005. (This could be called “Fetal Rubin”).

Recommended Atlas:

Robbins and Cotran Atlas of Pathology, 2nd addition
The Rubin series does not have an Atlas, but the Robbins Atlas would be fine to use.

Pharmacology

Required Text:

Golan, Tashjian, Armstrong and Armstrong, Principles of Pharmacology: The Pathophysiological Basis of Drug Therapy 3rd edition. (Lippincott, 2012) *This is a well written comprehensive textbook, with very good figures to explain difficult concepts. As a required textbook all reading assignments will be in this book.*

Recommended Text:

Katzung, Masters, and Trevor, Basic and Clinical Pharmacology 11th edition (Lange 2009). *This text is available on-line through our library. It contains some special topics that can be useful.*

Katzung and Trevor's Pharmacology: Examination and Board Review 9th edition (Lange 2010)

Gallagher and MacDougall, *Antibiotics Simplified* 2nd edition. *This book is written by Dr. Gallagher who teaches in our course. It offers a succinct review of antibiotics.*

Shlafer, PreTest Pharmacology, 13th edition. *Review questions*

ICM

Required Text:

1. *Guide to Physical Examination and History Taking*, 10th ed Bates
2. *Rapid Interpretation of EKG's*, 6th ed Dubin

Recommended Text:

1. *Cecil Essentials of Medicine*, 10th ed Andreoli
2. *First Aid Q&A for the USMLE Step 1* 2nd ed Le
3. *Nelson Textbook of Pediatrics*, 18th ed Behrman
4. *Obstetrics and Gynecology*, 6th ed Beckmann

Psychopathology

Required Text:

The text, *Synopsis of Psychiatry* by Kaplan and Sadock, 5th edition, contains **required reading** for the course.

CPM

Required Text

There is no required textbook.

Recommended Resource Text

No required textbook.

US Preventive Services Task Force. Guide to Clinical Preventive Services,

<http://text.nlm.nih.gov/ftsr/dbaccess/cps>.

F Douglas Scutchfield, C William Keck - Editors Principles of Public Health Practice: (3rd ed) 2003, Australia, UK, USA, Thomson Delmar Learning

Bioethics

Required Text

Resolving Ethical Dilemmas: A Guide for Clinicians, by Bernard Lown, 4th edition
